

Company Information FAQ's

What kind of company is QTL? What do you do?

QTL Biosystems is a biotechnology company developing a new platform for homogeneous fluorescent assays. QTL Biosystems' first products will be custom assays developed with industry partners, and an expanding line of assay kits for selected protein targets (initially proteases and homogeneous protein immunoassays).

QTL Biosystems is also developing a hand-held fluorescent reader that will enable QTL Biosystems' line of assays to be performed in the field, for environmental pathogens, as well as rapid DNA testing.

Does QTL perform target specific assay for companies?

Yes. QTL Biosystems is seeking partners that are interested in developing new assays with QTL components and act as industry references for QTL assay performance.

Can QTL technology be licensed for "in house" assay development?

Yes. QTL Biosystems will license the QTL assay technology in order to facilitate "in house" assay development. Additionally, QTL Biosystems will also provide materials and technical support necessary for "in house" assay development, not excluding on-site training.

How do I place an order with QTL Biosystems?

To place an order with QTL, please go to www.qtlbio.com/ordering for the various ordering methods.

What type of payments does QTL accept?

QTL accepts the following forms of payments. Purchase order, credit card, email and fax orders.

Do you offer bulk pricing?

Yes we do offer volume discount pricing.

For pricing please inquire to sales or go to www.qtlbio.com/ordering
