

β -Secretase Microsphere Sensor
Catalog #: S-001MS
Lot #: TB2253

Product Information Sheet

- Description:** 0.6 μ latex microspheres sequentially coated with biotin binding protein and a water soluble *poly*(phenylene ethynylene) emissive polymer.
- Quantity:** 400 mL
- Form:** Suspension in pH 7.5 ± 0.1 phosphate buffer
- Storage:** Store refrigerated at 4°C
- Notes:** Minimize exposure to light. While the sensor is predominantly soluble, slight sedimentation may occur; stir/agitate thoroughly prior to first use and occasionally during prolonged use.
